portfolio

Education

Amity University, Uttar Pradesh

B.Tech in Computer Science and Engineering

Sep. 2022 – May 2026

CGPA: 8.35

Experience

Software Developer Intern

May 2025 – Jul 2025

Rimark Technology, Remote

- Contributed to a production-level job portal by implementing backend services and responsive frontend components.
- Integrated RESTful APIs, optimized SQL queries, and reduced application defects by 30% through systematic debugging.
- Collaborated in Agile sprints, participated in code reviews, and followed SDLC best practices using Git.
- Performed API testing, backend debugging, and query optimization to improve system reliability and data consistency.

Projects

AI-Enabled Geospatial Agriculture Analytics Platform (CST UP Grant) [Link](#)

2025 – Ongoing

- Selected under the CST UP Engineering Students' Project Grant Scheme for applied analytics research.
- Unified satellite imagery, IoT sensor data, and historical datasets for large-scale agricultural analysis.
- Leveraged CNN and LSTM models to forecast crop yield and support irrigation optimization.
- Created dashboards to present crop health indicators and irrigation patterns.

Multimodal Deepfake Detection System [Link](#)

2025

- Designed and implemented a full-stack application using a FastAPI backend and React frontend to detect deepfake content from video and audio inputs.
- Built modular Python services for video and audio preprocessing using OpenCV and Librosa to enable efficient and scalable media analysis.
- Integrated CNN-based machine learning inference pipelines and exposed them through REST APIs, emphasizing clean architecture, performance, and maintainability.

Job Portal Analytics & Insights System [Link](#)

2024

- Analyzed job portal datasets using SQL and Python to study user behavior and application trends.
- Identified skill-demand patterns and platform usage metrics through exploratory data analysis.
- Generated analytical reports to support data-driven business and product decisions.

Technical Skills

Programming Languages: Java, Python, SQL, R

Data Science & Analytics: Data Analysis, Statistical Analysis, Feature Engineering, Exploratory Data Analysis (EDA), Model Building, Model Evaluation, Business Insights

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, FastAPI, Flask

Web Technologies: HTML, CSS, JavaScript, Responsive design

Databases: MySQL, SQL Queries, Joins, CRUD Operations

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

Tools & Practices: Git, GitHub, Postman, Power BI, Debugging, Unit Testing, Agile Scrum

Certifications

- Introduction to Artificial Intelligence — IBM
- Front-End Development — Meta
- SQL for Data Science - IBM

Achievements

- Completed a 365-day coding challenge, solving 500+ problems in Data Structures and Algorithms.
- Awarded Reliance Foundation Scholarship for academic excellence (2022–2026).
- Qualified JEE Mains 2022 at the national level.
- Qualified A-UPCST project based on evaluation of an applied machine learning project demonstrating technical merit.
