Education

Amity University, Uttar Pradesh

B.Tech in Computer Science and Engineering

Sep. 2022 – May 2026

CGPA: 8.35

Experience

Software Developer Intern

May 2025 – Jul 2025

Rimark Technology, Remote

- Contributed to a production-level job portal by implementing backend services and responsive frontend components.
- Integrated REST APIs, optimized SQL queries, and reduced application defects by 30% through systematic debugging.
- Collaborated in Agile sprints, participated in code reviews, and followed SDLC best practices using Git.

Projects

AI-Enabled Geospatial Agriculture Analytics Platform (CST UP Grant)

2025 – Ongoing

- Selected under the CST UP Engineering Students' Project Grant Scheme for applied analytics research.
- Unified satellite imagery, IoT sensor data, and historical datasets for large-scale agricultural analysis.
- Leveraged CNN and LSTM models to forecast crop yield and support irrigation optimization.
- Created dashboards to present crop health indicators and irrigation patterns.

Job Portal for Employer and Employee (Full-Stack System)

2025

- Engineered a scalable full-stack job portal supporting job posting, application tracking, and profile management for 1K+ users.
- Developed role-based authentication, REST APIs, and secure database operations using SQL and MongoDB.
- Optimized backend workflows and database queries, improving response time by 25% and overall system reliability.

Multimodal Deepfake Detection System

2025

- Designed a multimodal deep learning framework to detect audio-visual deepfakes using CNN and Transformer architectures.
- Applied video frame extraction, feature fusion, and temporal modeling to enhance classification robustness.
- Achieved over 95% detection accuracy on benchmark datasets using PyTorch and OpenCV.

Autonomous AI Recommendation Engine

2025

- Architected a personalized recommendation engine using collaborative filtering and reinforcement learning techniques.
- Handled cold start scenarios and improved recommendation relevance by 20% through feedback-based ranking optimization.
- Evaluated model performance using precision, recall, and ranking-based evaluation metrics.

Technical Skills

Programming Languages: Java, Python, SQL, C++

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

Backend & APIs: REST APIs, FastAPI, Flask

Web Technologies: HTML, CSS, JavaScript, React

Databases: MySQL, SQL Queries, Indexing, Joins, CRUD Operations, MongoDB

Tools & Practices: Git, GitHub, Postman, Debugging, Unit Testing, Agile Scrum

Certifications

- SQL for Data Science — IBM
- Introduction to Artificial Intelligence — IBM
- Front-End Development — Meta

Achievements

- Completed a 365-day coding challenge solving 500+ Data Structures and Algorithms problems.
- Awarded Reliance Foundation Scholarship for academic excellence (2022–2026).
- Qualified JEE Mains 2022 at the national level.
- Selected for CST UP project grant based on applied analytics evaluation.
